

At Macfadden, we understand the vast, complex regulatory requirements that protect and promote the safety and security of the public. Our IT solutions enable federal agencies and regulators to apply information technology to develop modern, efficient and secure systems that better protect our environment, our food supply and our nation. We help agencies and organizations develop sound compliance practices that translate into efficient, cost-effective and transparent operations. As a result, our compliance and monitoring expertise enables clients to collect and analyze information and provide reporting mechanisms and metrics that allow agencies and organizations to assess and evaluate ongoing compliance efforts.

Macfadden has extensive experience working with regulatory agencies such as the U.S. Food and Drug Administration and the Environmental Protection Agency.

Electronic Records/Document Management

Macfadden designs and implements documents and records management systems and provides various program-related consulting services. Macfadden is an expert provider of document imaging and text conversion services to support web publishing and other business objectives related to the electronic preservation and distribution of documents. Macfadden has the expertise and knowledge to perform a full suite of document management services.

Financial Systems and Accounting Support Services

Macfadden possess a thorough understanding of federal accounting and regulatory requirements as well as Financial Accounting Principles and Standards as directed by the Federal Accounting Standards Advisory Board (FASAB). We specialize in supporting the operation and maintenance of Oracle Federal Financials-based core accounting systems. Our team of financial experts is adept at developing functional requirements/specifications, system interface requirements, testing, implementation and training plans.

IT Security Compliance

Macfadden helps clients develop aggressive and dynamic security programs to ensure IT systems are certified, accredited and properly authorized for production. We provide federal clients with direct support to Information Systems
